

## ST036XL Automatic Hardcover Machine

### Product sample:

### Product flow:

### Machine Parameter:

Overall size	3900x4050x2000mm
Weight	5000 (kg)
Voltage	380/220 (v)
Power	10.4 (kw)
Speed	10-36 (pcs/min)
Machine Color	Red and grey

### Technology Parameter:

Max case size	850×450 (mm)
Min case size	150×110 (mm)
For special size	100×50 (mm)
Center board size	6-100(mm)
Board thickness	1-5(mm)
Cover thickness	70-250 (g/㎡)
Gutter thickness	1-17(mm)

## ST036XL Automatic Hardcover Machine (side wings)

### Function:

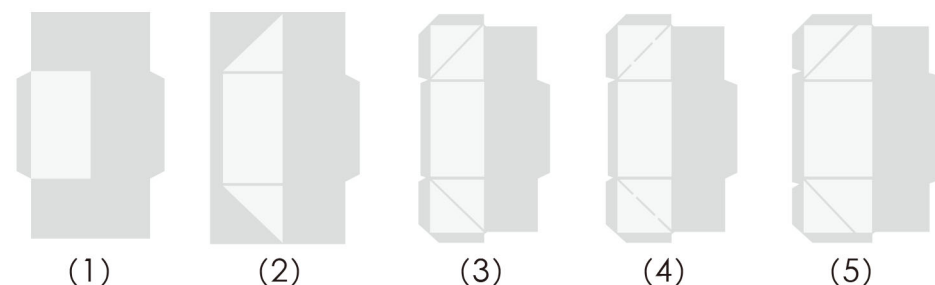

- Awarded national patent of vacuum exchange system technology
- Whole computerized digital function and malfunction display
- Automatic oil lubrication system
- Round corner device(option)
- Side wings of collapsible box system(option)
- Window device(option)
- Smaller size device(option)
- Different shape device(option)
- Can make different size device (Up to 7 pcs boards, option)

### Advantages:

- Advanced cover bending device adopts steel binding knife to make nicer and compact hardcover, which can greatly improve the customer satisfaction.
- The machine is driven by the cam which greatly improve the machine stability and machine the hardcover position more precisely especially for the demanding packaging products, thus meet the customer's requirements easily.
- The unique round corner device completely solves the round corner production problem, So it can greatly enlarge your business scope and improve the company profits.
- Personalized bending device can make various different different shape hardcover case such as triangle, trapezium, arc, S shape, which can diversify your products.
- Various cover materials can not only meet the high requirements for the thick paper, card paper, PU etc. But also can meet more technological requirements .

- One machine with multiple functions, which is realized to easy change the ordinary case and collapsible box system.
- Wide adaptability which can meet various collapsible box requirements.
- The format change easily, which can meet all the size of side wings making and without special mold.
- Wide size range to meet different side wing size requirements. maximum height can be 180mm, Minimum height can be 45mm.

- (1) 1 board side wings
- (2) 3 pcs board side wings
- (3) 5 pcs board side wings
- (4) 5 pcs board side wings with the connected triangle board
- (5) 5 pcs board side wings with the different shape triangle board

### Side wings technology parameter:

Max side wings size	800×180 (mm)
Min side wings size	200x50mm, special can be 200x45mm
Triangle board thickness	250-1500 (g/㎡)
Speed	10-25pcs/min
