

Sterling® Digibinder

The Sterling® Digibinder is a table top perfect binder that thinks it's a floor model. With this fully automated perfect binder, the book size, the pneumatic clamp, and the nipper are completely self adjusting. The unique roughing blade roughs the entire backbone of the book and notches instead of just notching. Twin glue rollers ensure an even glue application. There is absolutely no set up. Go from thick books to thin books without any adjustments! The machine side glues and many books can be bound without the need to crease.

Features

- Bind books automatically with the touch of a button.
- Self adjusting book thickness.
- Good for runs of one, one thousand, or five thousand.
- No jam ups, no set ups.

Perfect bind up to 360 books per hour up to 2 inches thick! Small enough for an office, the Digibinder is also ideal for in plant and on demand printers. One touch perfect binding is here with the Sterling Digibinder perfect binder.
